Removing a Course Link

### Appendix C - Detailed Workflows Guide

Synchronization of Students from Canvas

Synchronization of grades to Canvas

# Overview

LMS integration with Canvas can be implemented using the kuraCloud app.

The kuraCloud app adds the following functionality to your kuraCloud and Canvas environments:

- Synchronization of students from Canvas courses to kuraCloud courses.
- Synchronization of student kuraCloud grades to Canvas.

**Note:** kuraCloud supports the most recent version of Canvas.

## Setup

LMS integration is disabled by default on new and existing instances. A request to have it enabled for an instance can be submitted via your ADInstruments representative.

Setup is required from within both kuraCloud and Canvas and will require an administrative account on both platforms. The following steps outline the initial setup, however, a more detailed guide with screenshots may be found in [Appendix A](#).

### 1. Activate LMS integration

Contact your ADInstruments representative to have LMS integration enabled for your kuraCloud instance.

### 2. Obtain Secret and Consumer keys and Config URL

kuraCloud and Canvas use a shared secret keys to ensure that only your Canvas instance can connect to your kuraCloud instance. Generate Secret and Consumer keys within kuraCloud as well as the config URL to enable communication with Canvas:

- As a kuraCloud Administrator, navigate to *Instance Administration*.
- Select *LMS Integration* then *Configure LMS Integration*. Please note this menu will not be visible until LMS Integration is enabled for your kuraCloud Instance.
- Select Canvas from the drop-down menu then press *Enable LMS Integration* button.

Copy the provided Keys and config URL to a safe place. This is important because your keys and URL can be viewed only once in kuraCloud, losing this will require the generation of completely new keys.

**CARE REQUIRED:** It is strongly recommended that new keys are generated for your production Canvas installation following trials within a test environment. This will ensure data from your test

environment is no longer synchronized with kuraCloud.

### 3. Install the App

Navigate to the appropriate Canvas account level and follow the instructions to install the app as provided by Instructure here:

<https://guides.instructure.com/m/4152/l/74482-how-do-i-configure-an-external-app-for-a-course-using-a-url>

Use the keys and config URL acquired from kuraCloud.

### 4. Authorize the App

kuraCloud requires advanced permissions to take actions like bulk importing of grades, performing these actions requires the kuraCloud app to act as the user. In order to allow kuraCloud to act on your behalf in Canvas, you will need to provide it with a Canvas developer key. Do this by:

- Click the dropdown for the kuraCloud App and select *Configure*.
- Copy the Redirect URI.
- Go to *Admin > Developer Keys* in Canvas.
- Add a Developer Key using the Redirect URI.
- Copy the Developer ID and Developer Key.
- Go to *Settings > Apps*.
- Click the dropdown for the kuraCloud App and select *Configure*.
- Enter the Developer ID and Developer Key.
- If using a scoped developer key tick the *Using scoped key* box.

The app is now authorized to make changes to courses required to import grades and sync users.

### Note - Scoped Developer Keys

kuraCloud-Canvas integration supports scoped developer keys for additional security. The scope of API's that the integration requires are (Scopes added in the most recent version are shown in **bold**):

- Accounts

url:GET|/api/v1/accounts/:account\_id/courses

- Assignment Groups

url:GET|/api/v1/courses/:course\_id/assignment\_groups

url:POST|/api/v1/courses/:course\_id/assignment\_groups

- Assignments

url:POST|/api/v1/courses/:course\_id/assignments

**url:GET|/api/v1/courses/:course\_id/assignment\_groups/:assignment\_group\_id/assignments**

- Courses

url:GET|/api/v1/courses/:id

url:GET|/api/v1/courses/:course\_id/users

- Enrollments

url:GET|/api/v1/courses/:course\_id/enrollments

- Progress

url:GET|/api/v1/progress/:id

- Sections

url:GET|/api/v1/courses/:course\_id/sections

- Submissions

url:GET|/api/v1/courses/:course\_id/assignments/:assignment\_id/submissions

url:POST|/api/v1/courses/:course\_id/assignments/:assignment\_id/submissions/update\_grades

- Users

url:GET|/api/v1/users/:id

This list is also available in the App Configuration dialog box.

# Configuration

The following steps outline the configuration of kuraCloud integration from within Canvas. A more detailed guide with screenshots may be found in [Appendix B](#).

## Create a course Link

Before following these steps you must ensure that the course(s) to be linked exist in both kuraCloud and Canvas.

You must link Canvas courses to kuraCloud courses before they can be synchronised, this must be done from the *Admin* section in the correct Sub-Account in Canvas.

- Go to the kuraCloud App (as named during installation).
- Click “*Create New Link*”.
- Select the Canvas and kuraCloud Courses you wish to link together.
  - You can use the provided search boxes to narrow down the list.
- Click “Link Courses”
- Navigate to the linked Canvas course.
- Go to *Settings > Navigation*.
- Drag the kuraCloud App into the navigation list.
- Click *Save*.

**Note:** When linking is complete you will no longer be able to edit the students from within that kuraCloud course.

## Removing a Course Link

Removing a Course link must be done from the Admin section of the correct sub-account in Canvas.

- Go to the kuraCloud App (as named during installation).
- Find the link in the list provided.
- Click “*Remove Link*”.

**Note:** The following information may be useful to users that are considering the removal of a course link:

- If a course link is removed, student accounts that were synchronized from Canvas will remain in the kuraCloud course. These accounts may be deleted manually from within kuraCloud.
- A link may only be removed from active kuraCloud courses. If a kuraCloud course is

deleted it must first be restored before the link can be removed. This kuraCloud course may safely be deleted again when the link is removed.

## Workflows

The following section outlines standard workflows, however, a more detailed guide with screenshots may be found in [Appendix C](#).

Please note only default Teacher and Admin roles are able to use the kuraCloud App to synchronize students and grades.

### Synchronization of Students from Canvas

Students can be Synchronized from within a linked Canvas course.

- Click on the kuraCloud App (as named during installation).
- Click *Sync Accounts*

**CARE REQUIRED:** Be sure to carefully review the detailed summary that is provided to ensure you are happy with the outcome of this synchronization. The following important points should be considered:

1. Students that exist in your kuraCloud course but not in Canvas will be deleted from kuraCloud.
2. If a student's email has changed in kuraCloud or Canvas following a previous synchronization, the student's kuraCloud account will be deleted and a new invite will be sent to their new email address.
3. Only Canvas users with the course role of 'Student' will be synchronized to kuraCloud. (This is a default role within Canvas)
4. kuraCloud sections will be created to match sections existing in the Canvas course. Students can only exist in one section in kuraCloud so they will be assigned to the first section they are in alphabetically in Canvas. The integration allows you to choose the sections that are created in kuraCloud. Use 'Select Sections' to choose only the sections relevant to kuraCloud.

- Select *OK* to confirm synchronization.

Students that have been synchronized will be created within the linked course in kuraCloud and be sent an invite email. If the kuraCloud course already contains students with a matching email address from Canvas their details will be updated and no invite will be sent.

If you make changes to student's details (including deleting students) within a linked course you

should resynchronize to ensure consistency across platforms.

### **Synchronization of grades to Canvas**

This will synchronize all grades within a linked course from kuraCloud to Canvas. Within Canvas navigate to the course:

- From the kuraCloud app select *Sync grades*.

**Note:** It is generally recommended that you sync students before syncing grades, as only grades for synchronized students will be added to Canvas.

cc

### **Editing and Deleting Courses**

Course links are resilient and will be remembered if the following occurs:

- A linked kuraCloud course is deleted.
- A linked Canvas course is deleted.

Restoring the deleted course on either platform will reinstate the functionality of the link so it can be used again.

Deleting a course within one platform will not delete the corresponding course within the other platform.

# Support and Troubleshooting

## Supported Canvas Versions

The kuraCloud app supports the latest version of Canvas.

## Resolving Issues

If you are experiencing problems with installing and/or using the kuraCloud app please contact your Canvas administrator in the first instance. This will allow them to check the Canvas logs for issues, this can be done as follows:

- Navigate to Admin.
- Select *Admin Tools*.
- Select *Logging*.

If your Canvas administrator is unable to rectify the issue, please contact your ADInstruments representative and provide them with the following:

- A detailed description of your issue, including the approximate time that it occurred.
- Applicable screenshot(s) that illustrate the issue.

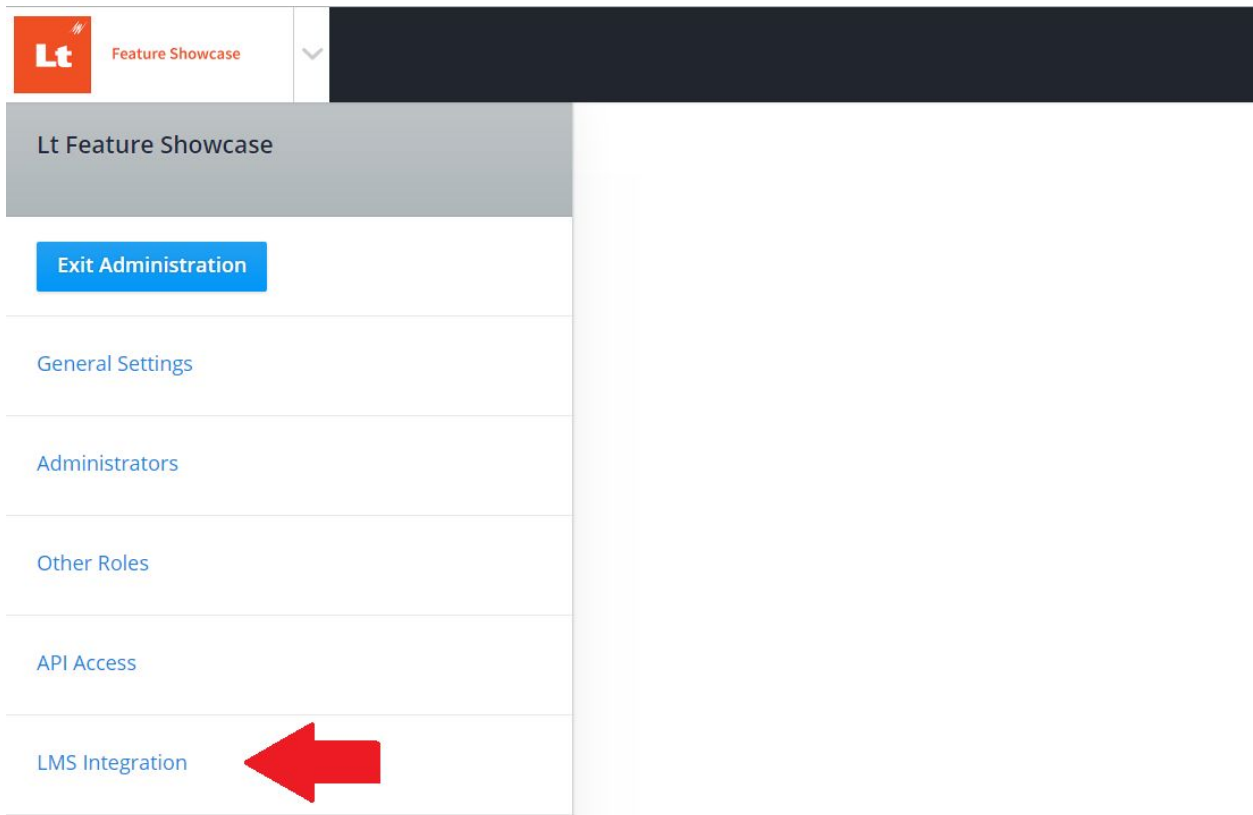

.

# Appendix A - Detailed Setup Guide

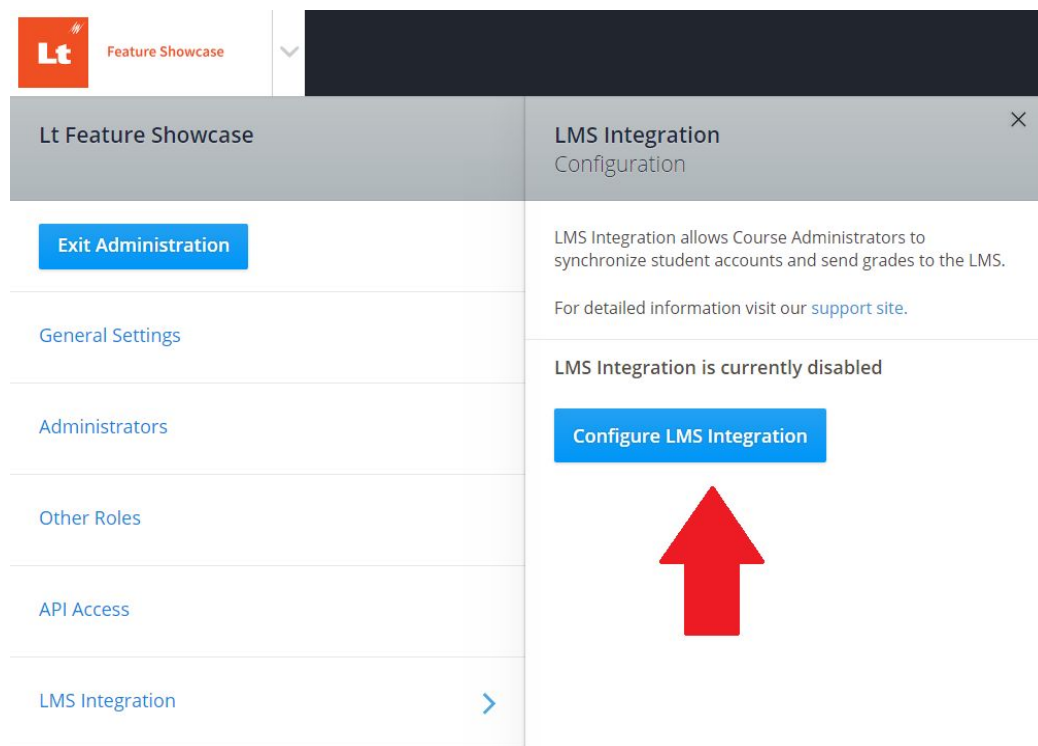

Please ensure you have contacted your ADInstruments representative to have LMS integration enabled for your kuraCloud instance.

## Obtain Keys

To generate Keys within kuraCloud to enable communication with Canvas, then as a kuraCloud Administrator navigate to *Instance Administration*.

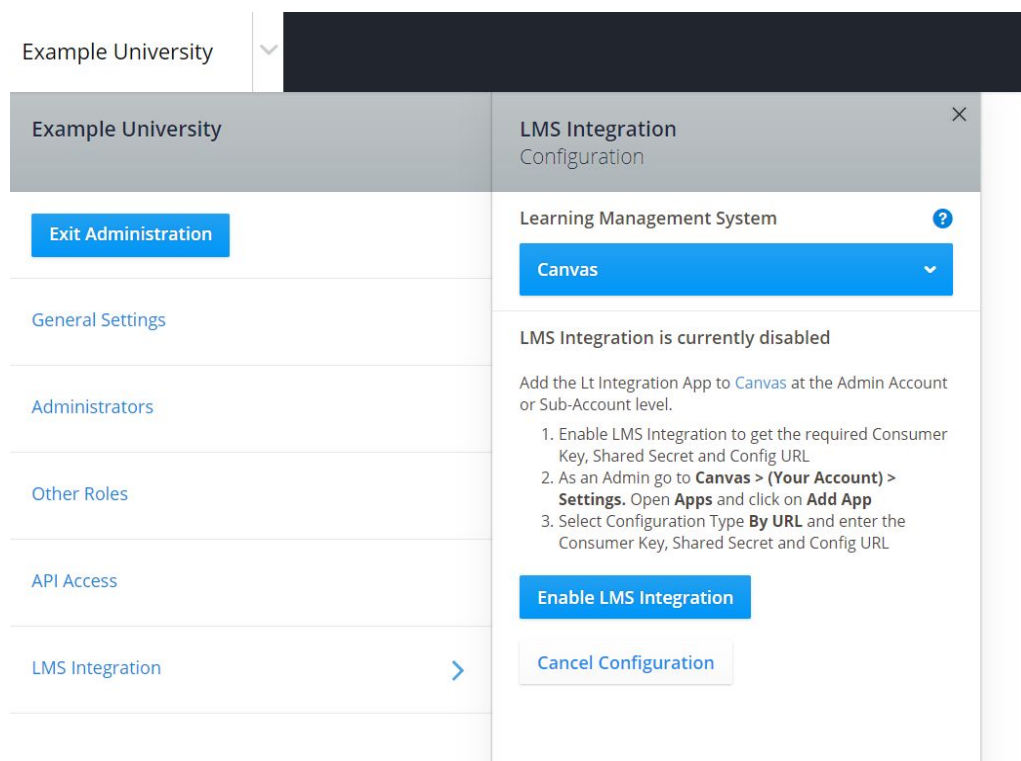

Select *LMS Integration* then *Configure LMS Integration*. Please note this menu will not be visible until LMS Integration is enabled for your kuraCloud Instance.

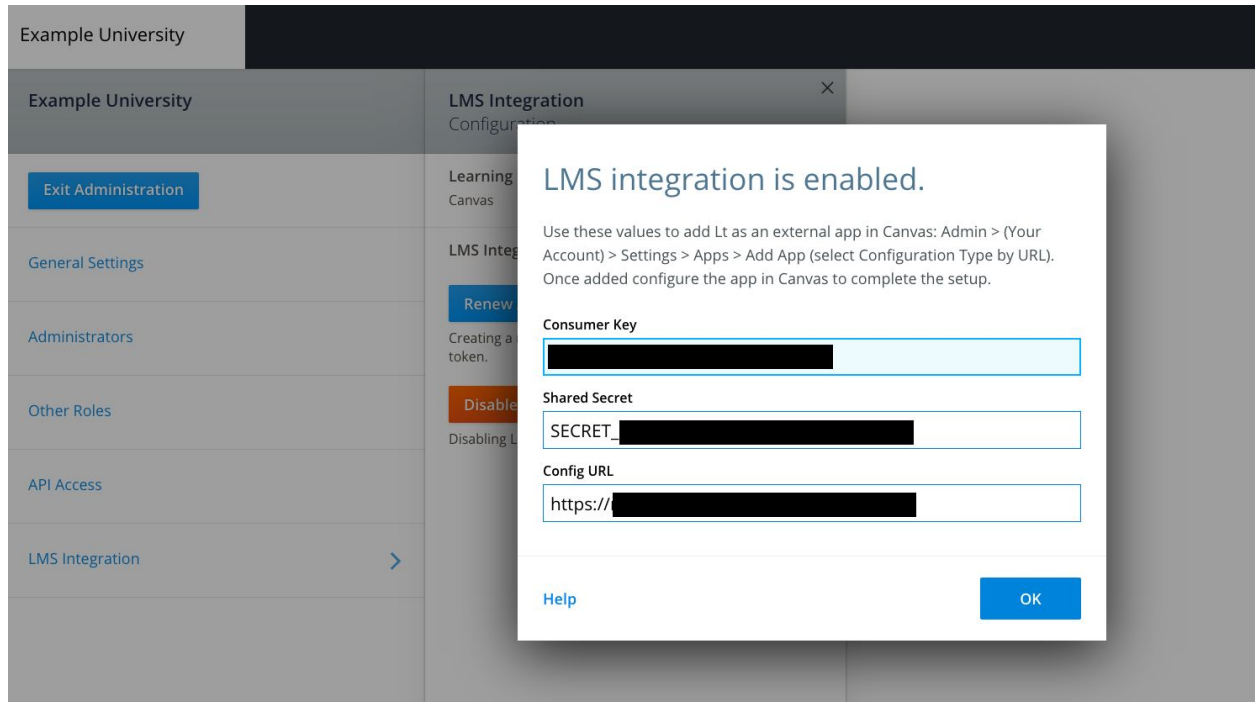

The screenshot shows the 'Lt Feature Showcase' sidebar on the left with a menu containing 'Exit Administration', 'General Settings', 'Administrators', 'Other Roles', 'API Access', and 'LMS Integration'. The 'LMS Integration' item is highlighted with a blue arrow. The main content area is titled 'LMS Integration Configuration' and contains the following text: 'LMS Integration allows Course Administrators to synchronize student accounts and send grades to the LMS. For detailed information visit our [support site](#). LMS Integration is currently disabled'. A large red arrow points to a blue button labeled 'Configure LMS Integration'.

Select *Canvas* from the drop-down menu.

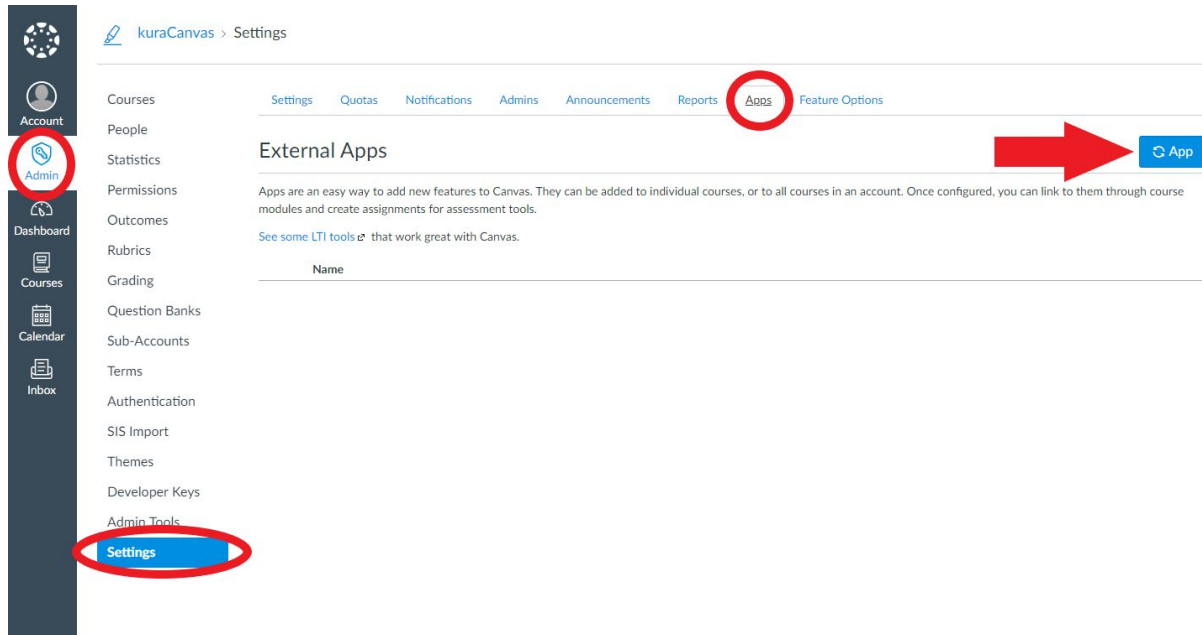

The screenshot shows the 'LMS Integration Configuration' page with 'Example University' selected in the top header. The sidebar on the left is the same as in the previous image. The main content area shows 'Learning Management System' with a dropdown menu set to 'Canvas'. Below this, it states 'LMS Integration is currently disabled' and provides instructions: 'Add the Lt Integration App to Canvas at the Admin Account or Sub-Account level.' followed by a numbered list: 1. Enable LMS Integration to get the required Consumer Key, Shared Secret and Config URL. 2. As an Admin go to **Canvas > (Your Account) > Settings**. Open **Apps** and click on **Add App**. 3. Select Configuration Type **By URL** and enter the Consumer Key, Shared Secret and Config URL. At the bottom, there are two buttons: 'Enable LMS Integration' (blue) and 'Cancel Configuration' (light blue).

Press the *Enable LMS Integration* button. Copy the provided Keys to a safe place. This is important because your Keys can be viewed only once in kuraCloud, losing this will require the generation of completely new Keys.

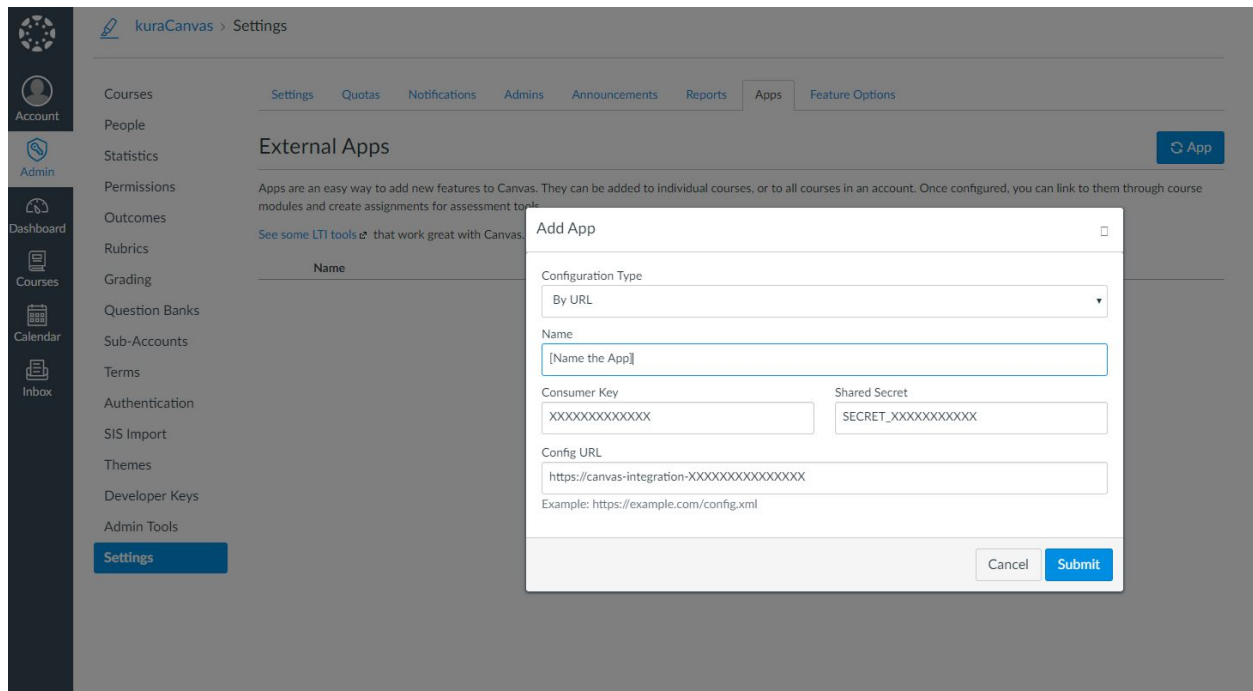

## Install the App

Navigate to **Admin > Settings > Apps** and click on **App**.

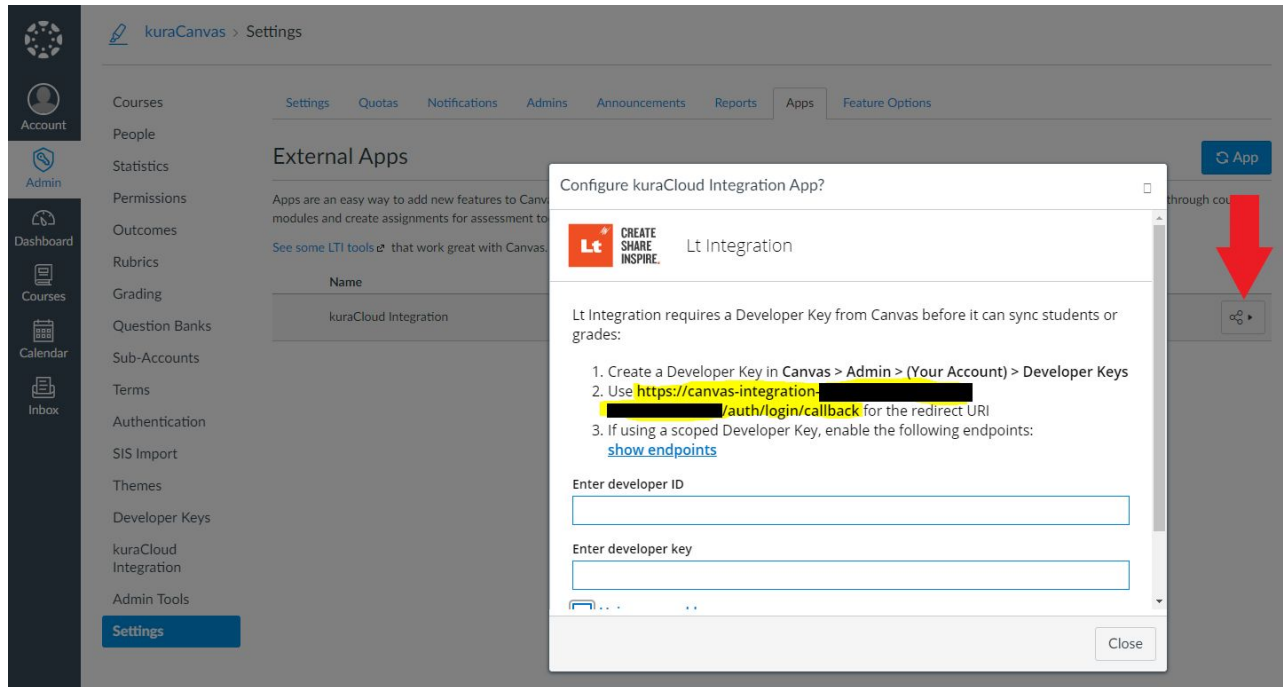

Select **By URL** from the dropdown, then name the app something appropriate and enter in the Keys and URL acquired from kuraCloud.

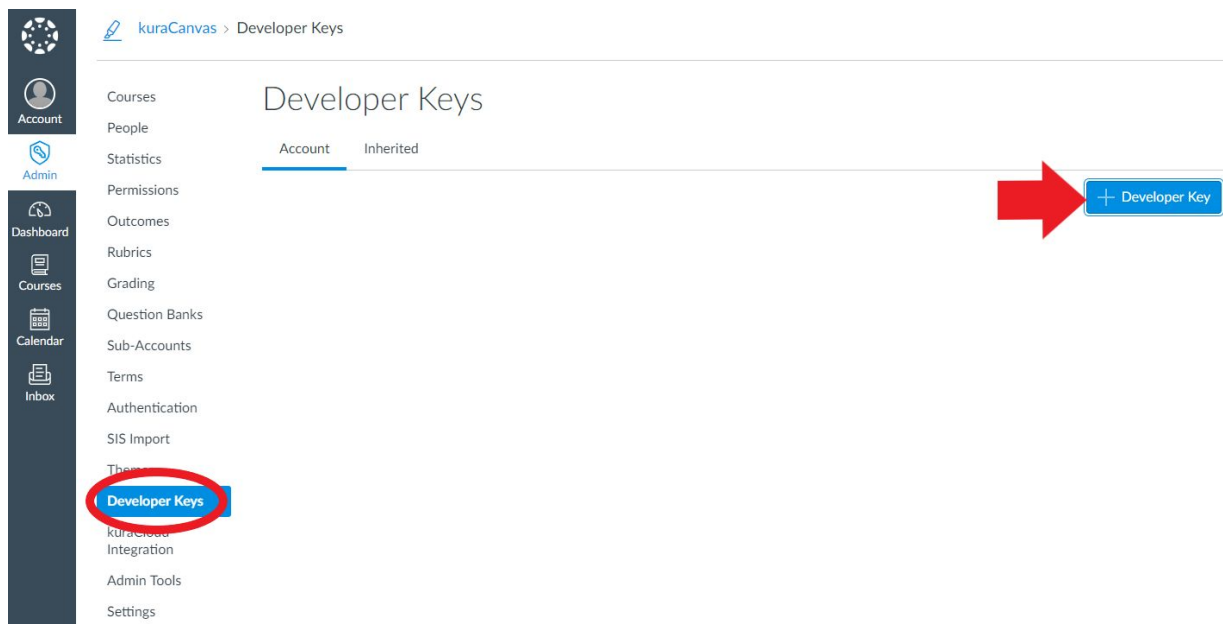

## Authorize the App

Click on configure button to acquire the Redirect URI.

Go to *Developer Keys* and add a key or identify a suitable existing key. The Developer key must use the redirect URI.

Apply the key scope if necessary.

External Apps

Apps are an easy way to add new features to Canvas. They can be added to individual courses, or to all courses in an account. Once configured, you can link to them through course modules and create assignments for assessment tools.  
See some LTI tools that work great with Canvas.

Name

kuraCloud Integration

➡

Enter your developer ID and Developer key and check “Using scoped key” if appropriate.

The screenshot shows the Canvas LMS Admin interface. The left sidebar contains navigation links: Account, Admin, Dashboard, Courses, Calendar, and Inbox. The main content area is titled 'kuraCanvas > Settings' and shows the 'External Apps' section. A modal window titled 'Configure kuraCloud Integration App?' is open, displaying the following instructions:

- 1. Create a Developer Key in Canvas > Admin > (Your Account) > Developer Keys
- 2. Use <https://canvas-integration-develop-test-us-east-1.kuracloud.com/auth/login/callback> for the redirect URI
- 3. If using a scoped Developer Key, enable the following endpoints: [show endpoints](#)

The modal also includes input fields for 'Enter developer ID' (containing '100000...') and 'Enter developer key' (containing a long string of 'x' characters). A checkbox labeled 'Using scoped key' is checked. A 'Connect to Lt' button is at the bottom of the modal, and a 'Close' button is in the bottom right corner.

Finally, click on the App in the menu and click *Authorize*.

The screenshot shows the Canvas LMS Admin interface. The left sidebar contains navigation links: Account, Admin, Dashboard, Courses, Calendar, and Inbox. The main content area is titled 'kuraCanvas > kuraCanvas' and shows the 'kuraCloud Integration' app in the 'Apps' menu. The app is requesting access to the user's account, and the user is prompted to click 'Authorize'.

# Appendix B - Detailed Configuration Guide

## Create a course Link

Before following these steps you must ensure that the course(s) to be linked exist in both kuraCloud and Canvas.

Navigate to the correct Sub-Account in the admin menu that contains the Canvas course to be linked. In the *Admin* menu click on the kuraCloud app tab, (If you have not interacted with the app since logging in you will need to click *Authorize*) then click *Create Link*.

The screenshot displays the kuraCanvas admin interface. On the left is a dark sidebar with icons for Account, Admin, Dashboard, Courses, Calendar, and Inbox. The 'Admin' icon is circled in red. The main content area has a breadcrumb 'kuraCanvas > kuraCanvas' and a list of admin functions: Courses, People, Statistics, Permissions, Outcomes, Rubrics, Grading, Question Banks, Sub-Accounts, Terms, Authentication, SIS Import, Themes, Developer Keys, kuraCloud Integration (circled in red), Admin Tools, and Settings. The 'kuraCloud Integration' section is active, showing the 'Lt Integration' header with the 'Lt' logo and the text 'CREATE SHARE INSPIRE.'. Below this, the 'Course Linking' section explains that course links allow administrators to synchronize Canvas course student accounts and grades with an Lt course. A blue 'Create Link' button is prominently displayed and pointed to by a large red arrow. At the bottom, there are two columns: 'Canvas Courses' with the text 'No linked courses' and 'Lt Courses'.

Search for the Canvas course you want using the search box and select it from the list.

The screenshot shows the Canvas LTI Integration page. On the left is a dark sidebar with navigation icons and labels: Account, Admin, Dashboard, Courses, Calendar, and Inbox. The 'Courses' section is highlighted. The main content area has a breadcrumb trail: [kuraCanvas](#) > [Example university](#) > [Example university](#). Below the breadcrumb is a list of navigation links: Courses, People, Statistics, Permissions, Outcomes, Rubrics, Grading, Question Banks, Sub-Accounts, Themes, **kuraCloud Integration**, Admin Tools, and Settings. The 'kuraCloud Integration' link is highlighted in blue. The main content area is titled 'Lt Integration' with the 'Lt' logo and the text 'CREATE SHARE INSPIRE.'. Below this is a 'Back' button. A section titled 'Create Course Link' contains the text: 'Once courses are linked Sync Accounts and Sync Grades will be available to the Canvas course administrator.'. Below this is a section titled 'Canvas Courses' which contains a search box with the text 'Example Canvas Course' and a list of course names: Anatomy101, Anatomy102, Anatomy201, Anatomy202, Cardiology301, and Example Canvas Course. A red arrow points to the search box.

Scroll down and search for the kuraCloud course you want using the search box and select it from the list. Then click *Link Courses*.

The screenshot shows the Canvas LTI Integration page, scrolled down. The sidebar is the same as in the previous screenshot. The main content area has the same breadcrumb trail. The 'kuraCloud Integration' link is highlighted in blue. The main content area is titled 'Lt Integration' with the 'Lt' logo and the text 'CREATE SHARE INSPIRE.'. Below this is a section titled 'Lt Courses' which contains a search box with the text 'No course selected' and a list of course names: Anatomy101, Example kuraCloud Course, Physiology101, and Physiology201. A red arrow points to the search box. Below the list of course names is a 'Link Courses' button, which is highlighted with a red arrow.

**Note:** When link is complete you will no longer be able to edit the students from within that kuraCloud course.

Navigate to the linked Canvas course, select *Settings* > *Navigation*. Then drag the kuraCloud App into the navigation list. Then click *Save*.

## Removing a Course Link

Navigate to the correct Sub-Account in the admin menu for the course link to be removed. From the *Admin* menu click kuraCloud App:

Select *Remove Link* to delete course link

kuraCanvas > Manually-Created Courses > Manually-Created Courses

**CREATE SHARE INSPIRE.** Lt Integration

**Course Linking**

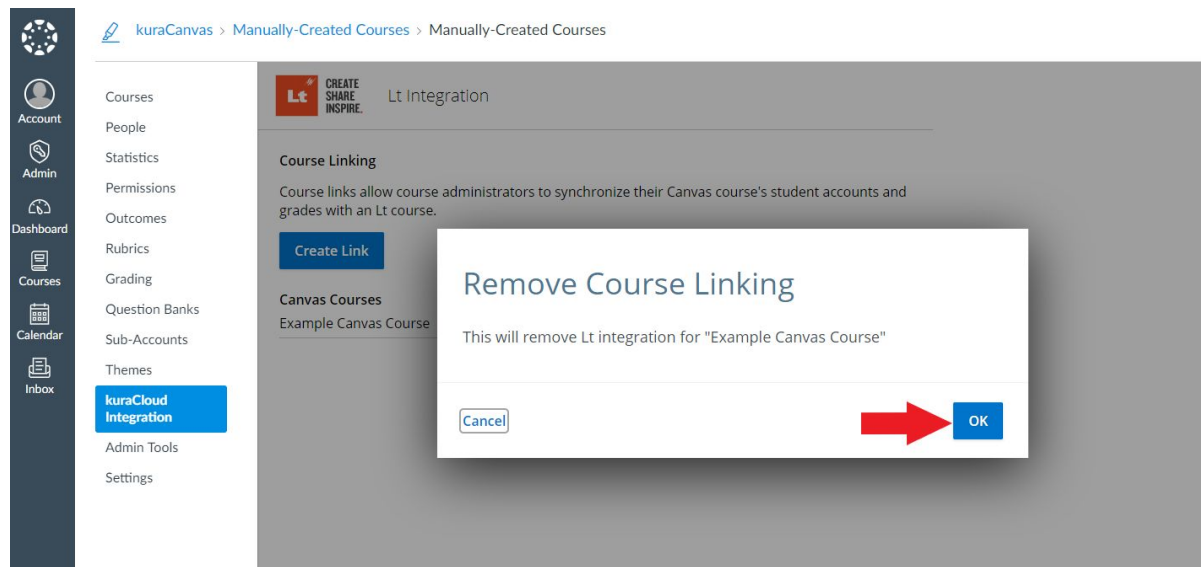

Course links allow course administrators to synchronize their Canvas course's student accounts and grades with an Lt course.

**Create Link**

Canvas Courses Lt Courses

Example Canvas Course	↔	Example kuraCloud Course	<b>Remove Link</b>
-----------------------	---	--------------------------	--------------------

Select *Ok* to confirm deletion.

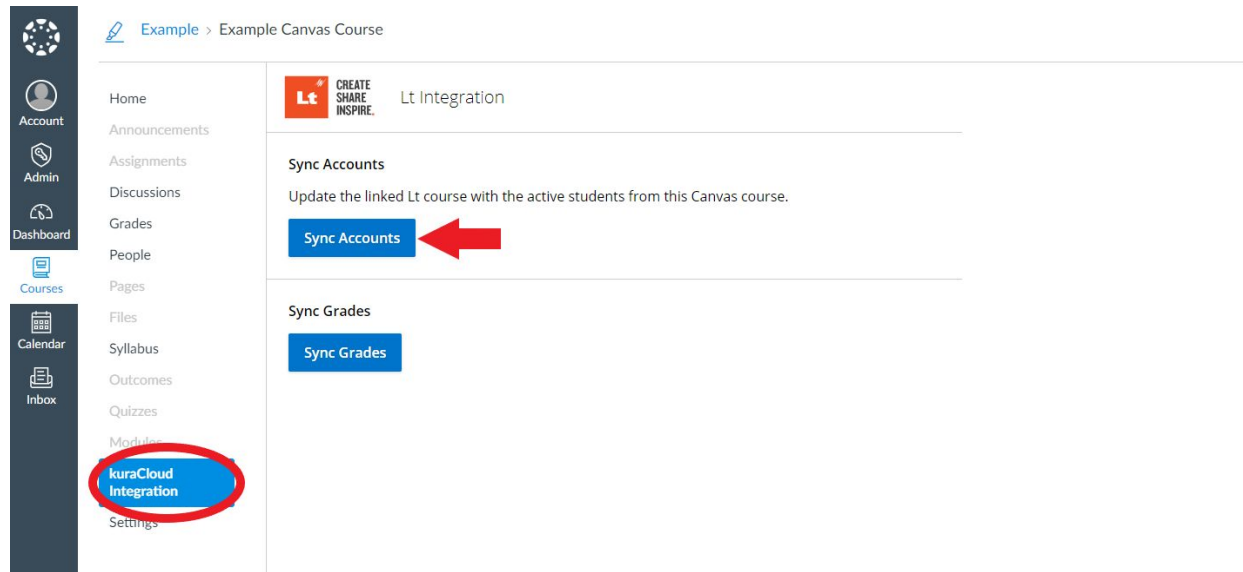

**Note:** The following information may be useful to users that are considering the removal of a course link:

- If a course link is removed, student accounts that were synchronized from Canvas will remain in the kuraCloud course. These accounts may be deleted manually from within kuraCloud.
- A link may only be removed from active kuraCloud courses. If a kuraCloud course is deleted it must first be restored before the link can be removed. This kuraCloud course may safely be deleted again when the link is removed.

# Appendix C - Detailed Workflows Guide

## Synchronization of Students from Canvas

Within Canvas navigate to the course then select the kuraCloud app and click select Sync Accounts. The users to be added, updated and deleted will be displayed.

**CARE REQUIRED:** Be sure to carefully review the detailed summary that is provided to ensure you are happy with the outcome of this synchronization. The following important points should be considered:

1. Students that exist in your kuraCloud course but not in Canvas will be deleted from kuraCloud.
2. If a student's email has changed in kuraCloud or Canvas following a previous synchronization, the student's kuraCloud account will be deleted and a new invite will be sent to their new email address.
3. Only Canvas users with the course role of 'Student' will be synchronized to kuraCloud. (Teachers and custom roles will not be synchronized.)

Select **OK** to confirm synchronization.

The screenshot shows the Canvas LTI Integration interface. On the left is a dark sidebar with navigation icons for Account, Admin, Dashboard, Courses, Calendar, and Inbox. The main content area has a breadcrumb trail 'Example > Example Canvas Course'. Below this is a header with the 'Lt' logo and the text 'CREATE SHARE INSPIRE. Lt Integration'. The 'Sync Accounts' section contains the instruction 'Update the linked Lt course with the active students from this Canvas course.' followed by a grey box listing synchronization status: 'No students will be added to Lt', 'No students need to be restored in Lt', 'No students need to be updated in Lt', 'No students need to be deleted from Lt', and 'No sections need to be created in Lt'. Below this box is a blue 'OK' button, which is highlighted by a large red arrow. Further down, the 'Sync Grades' section contains a blue 'Sync Grades' button.

Students that have been synchronized will be created within the linked course in kuraCloud and be sent an invite email. If the kuraCloud course already contains students with a matching email address from Canvas their details will be updated and no invite will be sent.

If you make changes to student's details (including deleting students) within a linked course you should resynchronize to ensure consistency across platforms.
